

A NEW HOSPITALITY IN HISTORIC SURROUNDINGS, SUPERBLY LOCATED

EVENT TECHNOLOGY

Lighting and sound are a matter for the event engineers. The light and sound for our events at the Malkasten have been in the hands of the firm of STUDIO- & BÜHNEN-TECHNIK MICHAEL THEISEN for years - putting company or family celebrations in not just 'the' limelight, but into one individually tailored as a lighting concept for the occasion in hand. For events on a larger scale, the firm organises the entire sound and lighting schedule, the staging and direction of presentations of products or services, and the production of multimedia events.

Take these three examples:

1. CONFERENCE TECHNOLOGY

Situation: Lecture, audience, round of discussions

Event technology comprises table-top, cordless and room microphones, sound system, screens, flip charts, pin boards, recording of the contributions for the records

2. CORPORATE PRESENTATION

Situation: presentation of products or services

Event technology: Light and sound systems, screens, microphones, presentation apparatus (LCD projector, PC), recording the event

3. GALA EVENT

Situation: banquet, dance floor, stage performance

Event technology: atmospheric lighting for the banquet in the hall; floodlighting for stage; DJ equipment
